

We are specialists in the Food and Temperature Controlled Industry.

We are independent designers, engineers and technical specialists, who provide turnkey design, project management & consultancy services.

Our services range from initial feasibility/concept through to project design, tendering & management.

We also provide specialist consultancy services including mechanical, electrical, insulation & refrigeration disciplines.

To date, we have successfully designed over ¼ billion cubic feet of refrigerated facilities, which include meat, fish & food processing, high risk processing, refrigerated distribution centres, chill & coldstores.
